

Gnathodontics, Ltd.- Lab Facts

Winter 2002

- ☑ We are an NADL Certified, **Full Service Dental Lab** with department managers that are Certified Dental Technicians and are available and capable of answering your most complex technical questions.
- ☑ We're experts at tough combination and implant cases! Call Steve Kelly, Partial Department Manager or Gerald Pontasch, Crown & Bridge Manager to discuss case planning and design of your combination case. Call Steve Mott, Implant Department Manager for questions on your next implant case.
- ☑ *We're easy to work with!* We pick-up and deliver twice daily in the Denver Metro area and once a day along the Front Range from Pueblo to Ft. Collins, and in the near mountain areas. For our out of town doctors, we pay for UPS 2-day shipping **to and from** your office! Call John Bozis, Customer Relations Manager today for shipping materials and UPS shipping labels.
- ☑ We'll make you look good! Our **Empress** and **Procera** metal-free cosmetic work is the best in the region! Call Kevin Kelly, Ceramic Department Manager, or send your study models of that next case that has to be *just right!* *Tough veneer cases are our specialty.*
- ☑ We cast our own partial denture frameworks with the premium **Bego Wironium** alloy. Wironium is nickel and beryllium free, plaque resistant, and polishes to a smooth finish with a high surface luster. Our partial denture frameworks will seat quickly with little or no adjustment!
- ☑ Our **Denture Department** specializes in occusal splints and nightguards. We offer three different types of splints: soft, hard, and our new hybrid--soft inside, hard outside. We give you options!
- ☑ Gnathodontics will save you chairtime! We spend the time to fabricate your restoration so that it seats quickly and functions properly with minimal or no adjustments necessary. *There are no shortcuts to perfection!*

Call John Bozis today for more information or to schedule your next pick-up.
